***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-103, 121-130 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mouzin et al EP 0068999.

Mousin et al teach cyclopropane carboxamide compounds corresponding to those recited in the claims. See, for example, page 1 and page 3 line 15 where NR3R4 form a N-heterocyclic ring. Other closely structurally related compounds would have been obvious to one of ordinary skill in the art.

No claim is allowed.
